

## Seat Belts

Online Response to seat belt query.

1. <https://www.willshire.com.au/seat-belts/restorations>
2. Just to relate my experience in replacing seat belts in my 2CV.

If you go to an Auto Shop, they will contact **APV Products**, in turn they will contact you and get any requirements or specifications for your vehicle. They can make recommendations and be very specific in what is required for your vehicle, often with options, colour in some cases.

My requirements were to get longer seat belts for the front driver and passenger seats. The gentleman who got back to me via email is NAM TRAN. They do NOT deal directly with the public so you need to use an Auto Store to be your initial conduit.

The belts are then made for you and delivered to the store... you pick them up from there. A wonderful service and you are getting the Australian Compliance Standard belts. My service agent fitted them.

I have the smaller set of belts if anyone is interested.

Hope this is of service to you.

Regards
